Area: Knowledge Management

Topic: How to apply knowledge management techniques for application of engineering knowledge?

Problem: knowledge management is considered as a potential tool to deliver solutions. Here in more fundamental thoughts are required on how knowledge management can be used with engineering knowledge. Which are the modeling tools or technologies of knowledge management and how are they applied.

Need: To achieve success in engineering project, an organization must possess and share knowledge. As engineering projects require high level of knowledge as well as variety of knowledge applying knowledge management techniques can certainly help in improving execution of engineering projects.

Expected Outcome:

1. Develop a model for acquiring, analyzing and dissemination of knowledge by applying knowledge management techniques
2. The proposed model must Improve decision making, strategic planning, faster development of new technical approaches and faster more robust problem solving.
